Ken,

I think 1 hour would be sufficient. EPA is still working through our contracting process, so we may not have all the details lined up by the 13th, but we will walk through the plans and answer questions to the best of our ability.

EPA's preference is for Microsoft Teams. One of us at EPA can set up to host the meeting and send an invitation to everyone on this email once we finalize a time. EPA staff have been told to limit use of Zoom, due to IT security concerns.

Thanks,

Kris

Kris – thanks for the heads-up. I’ve cc’d members of the SRC team here – Parm & Davinder Hothi (SRC), Doug Byrd (SRC business liaison), James Getter (SRC property manager), and Tom Briggs (SRC environmental consultant with Landau Associates). I believe that we should plan for all of these individuals to attend the meeting and listen to the information that EPA wishes to share. I am wide open on July 13, and hope that everyone on our side can be available that day as well. July 15 works as a backup from 10:30 – 12:00 only.

How long do you believe we will need for the meeting – 1 hour? Would we want to have a Zoom or Microsoft Teams call so that we can Screen Share with diagrams of the SRC property that will help the discussions of where work will be performed, which areas need to be available for mobilization and demobilization, etc.. I’m happy to set up a Zoom call – unfortunately, my Teams account only allows me to participate but not to host meetings.

Thanks.

Hi Ken,

I spoke with Brooks and Jeff late in the day yesterday, and learned that EPA's planned mobilization date has been pushed out one week. The new planned mobilization date is July 27. Given that it's a week later that I had initially thought, I propose we meet the week of July 13th rather than next week. The closer we are to the mobilization date, the more information EPA will have to share with SRC. Our team (Jeff, Brooks, Erika, and I) are available from 9am-4pm on July 13. That is the best date for us. Alternatively, we are available from 10:30am-1pm on July 15. Please let me know what works best for the SRC group.

Thanks,

Kris
